

**CLAIMS LISTING**

1. (currently amended). A system for producing a storytelling book having a first set of one or more pages in diametric contraposition to a second set of one or more pages, comprising:

1. 2. 3.

a software program in a computer having subroutines for

accepting input from a user:

generating a first set of one or more pages from said input; and

generating a second set of one or more pages from said input,

wherein said second set of pages are to be oriented in diametric contraposition to said first set of pages.

2. (original). The system of claim 1 wherein said first set of pages corresponds to figures and text input by said user, and said second set of pages is automatically generated by said software program based on said first set of pages.

3. (original). The system of claim 1 wherein said second set of pages includes a subset of the information included in said first set of pages.

4. (original). The system of claim 1 wherein said first set of pages includes text and figures, and said second set of pages includes figures corresponding to said figures included on said first set of pages, and said second set of pages does not include text corresponding to said text included on said first set of pages.

5. (original). The system of claim 1 wherein said software program further comprises a subroutine for automatically displaying at least one page from said first set of pages and a second page from said second set of pages in diametric contraposition to each other.

6. (original). The system of claim 1 wherein said software program further comprises:  
a subroutine for automatically generating first indicia on one or more of said pages, said  
first indicia indicating how to place leaves containing said first and second sets of  
pages in diametric contraposition to each other.
7. (original). The system of claim 6 wherein said first indicia include binding instructions.
8. (original). The system of claim 6 wherein said first indicia include page numbers.
9. (original). The system of claim 6 wherein said first indicia include graphical symbols.
10. (original). The system of claim 6 wherein said first indicia correspond to second indicia  
on leaves of a blank book.
11. (original). A method for producing a storytelling book having a first set of one or more  
pages in diametric contraposition to a second set of one or more pages, comprising:  
operating a software program;  
providing input from a user to said software program;  
generating, using said software program, a first set of one or more pages from said input;  
and  
generating a second set of one or more pages from said input to be placed in diametric  
contraposition to said first set of pages.
12. (original). The method of claim 11 further comprising:  
generating said first set of pages corresponding to figures and text input by said user, and  
automatically generating said second set of pages based on said first set of pages.
13. (original). The method of claim 11 wherein said second set of pages includes a subset of  
the information included in said first set of pages.

14. (original). The method of claim 11 further comprising automatically displaying at least one page from said first set of pages and a second page from said second set of pages in diametric contraposition to each other.
15. (original). The method of claim 11 further comprising automatically generating first indicia on one or more of said pages, said first indicia indicating how to place leaves containing said pages in diametric contraposition to each other.
16. (original). The method of claim 15 wherein said first indicia include binding instructions.
17. (original). The method of claim 15 wherein said first indicia include graphical symbols.
18. (original). The method of claim 15 wherein said first indicia correspond to second indicia on the leaves of a blank book for insertion of leaves containing said first and second sets of pages.
19. (original). A kit for producing a storytelling book having a first set of one or more pages in diametric contraposition to a second set of one or more pages, comprising:
  - a software program for generating said first and second sets of pages from user input; and
  - a blank book for insertion of said first and second sets of pages.
20. (original). The kit of claim 19 wherein:
  - said software program further comprises a subroutine for automatically generating first indicia on one or more of said pages, said first indicia indicating how to place leaves containing said pages in diametric contraposition to each other; and
  - said first indicia correspond to second indicia on leaves of said blank book.
